

### What is a vision statement?

The vision statement should be a clear and inspiring description of what the subject aims to achieve in the future. It's like a guiding star—defining aspirations and setting a long-term direction. Think of it as answering the question: "Where do we want to go?" It's meant to be ambitious, motivating, and forward-thinking.

### Guiding criteria:

- Makes clear what is unique to the subject
- Reflects the key drivers in the context of that subject
- Is focussed on the essence of the subject
- Future focussed

### Vision statement

Health and Wellbeing empowers learners and their communities to flourish by exploring health determinants and engaging in health promotion. Students develop adaptability, resilience, and multiliteracy, preparing them for lifelong learning and sustained wellbeing.

The learning design fosters ethical, empathetic, and compassionate engagement with health issues by integrating conceptual knowledge with real world application. Learners engage with diverse perspectives and develop health and wellbeing literacy through inquiry and transdisciplinary learning, enabling them to advocate for positive change, social justice and health equity. This approach cultivates their confidence and capability to promote quality wellbeing for themselves and their communities.

***NB: as Subject Renewal Groups (SRGs) progress through the Subject Renewal process, plans and documents will be further refined and updated.***
